### Why R&D Logic

R&D Logic is your business partner who understands the complex challenges of R&D intensive companies. For two decades, R&D Logic has set the standards for Corporate and Portfolio Management (CPM) solutions.

#### RDL5

RDL5, our solution suite, enables business and science teams to make smarter, faster decisions by aggregating planning, actual and forecast data across the enterprise, applying “Life Science” specific rules. The result is a powerful visualization of business intelligence insight from our product DIMENSIONS.

DIMENSIONS, an industry first, featuring role based, multi-dimensional graphical dashboards designed specifically for R&D business needs.

Business and Science users can plan, monitor, analyze and ultimately manage performance across the R&D portfolio and the corporation as a whole.

A cloud based solution, RDL5 is available from anywhere, anytime setting new standards in optimizing your R&D Portfolio and corporate performance.

#### Services

Our software is coupled with a full array of professional services including: implementation, support, training, process automation, R&D best practices and hosting.

#### Expertise

We understand what you need to drive your business. Our expert services are from the life science industry, so we “walk the walk and talk the talk.” Our experienced team partners with you to deploy our solution in weeks. Our software is kept up-to-date with the latest methodologies and best practices.

#### On-Demand

Our customers select RDL5 functions relevant to their business. By configuring each installation, we can deliver specific role, and scenario based software solutions on-demand, the ultimate in efficiency and solution cost.

### Industry Specific

R&D Logic designed its software to be configured to match your business needs and to align with your organization and portfolio initiatives. R&D intensive companies have business models that are “four dimensional,” and our software platform is the only solution developed to highlight this dimension — project. This project focused methodology is the perfect match for your unique business requirements.
