Reporting and Dimensions

R&D Logic's unique platform offers business intelligence that enables finance and non-finance users to plan, monitor, analyze and, ultimately, manage performance across the R&D portfolio and the corporation as a whole.

R&D Logic offers various approaches for viewing and reporting information such as online views, standard and custom reports, graphical dashboard. Key stakeholders can access information using tools that work best for them, to easily manage their projects, portfolio or organization.

Project Views

"Science speak" — reporting and analyzing by activity, projects, programs, grants, collaborations, product lines by accessing R&D Logic built in project intelligence.

Department Views

"Business speak" — for traditional reporting based on organizational structure, reporting and analyzing.

Standard and Custom

- 100+ preformatted standard reports
- Report over the web or easily download for additional analysis
- Custom reports are available for online viewing, downloading to excel, drill down to transaction details
- Multiple and consistent formats such as SEC, project, division, product line
- Group multiple reports for simultaneous generation and distribution

Online View and Publish

- Reports can be accessed and viewed online or selected for publication

Export to Excel

- All standard, custom and many online views available for immediate export to excel
- Standard report requested as excel file
- Standard "snapshot" reports offers user defined excel workbook creation

Dimensions. A New Perspective

Manage your R&D Portfolio with confidence with real-time visual and interactive views of key performance indicators by organization, function and role.

Dimensions, is an industry first, featuring role based, multi-dimensional graphical dashboards designed specifically for R&D business needs.

Dimensions enables visualization of planning, actual, and forecast data in the RDL5 solution.

A cloud based solution, Dimensions can be customized to ensure the view required is available from anywhere, anytime, setting new standards in optimizing the R&D Portfolio and corporate performance.
