Software Features

R&D Logic's unique platform offers business intelligence that enables finance and non-finance users to plan, monitor, analyze and, ultimately, manage performance across the R&D portfolio and the corporation as a whole.

R&D Logic's time collection and reporting tool is designed to capture effort to activities via a user friendly and intuitive interface. Time and FTE information is fully integrated with costs for indirect costs allocations and fully burdened activity reporting.

Project and Activity Time by % and by Hour

- Input project time by percentage or hour
- Input time to task, activity, project, program, grant, and more
- Input daily, weekly, semi-monthly or monthly
- Collect hours for billing to collaborators and government

Project Full Time Equivalent Analysis

- Time is immediately converted into project FTE for allocation and analysis
- Project FTE reporting for project managers/leaders
- Collaborator reporting
- Grant reporting

Time Off Collection

- Collect time off taken by type: PTO, jury duty, personal, etc
- Time off scheduling
- Absorption of time off into project time

Online Approval

- Management review and approve of project time and time off
- Absorption and burdening on approval

Email Alerts

- Automated compliance, reminders and alerts

Absorption and Burdening

- Automatic non-project absorption
- Integration with ERP for automated indirect cost allocations
- Burdened and unburdened project FTEs

Benefits

- Align key initiatives with available project resources
- Enhance visibility and accountability of portfolio resources
- Improve quality and utility of collected project time
- Increase compliance through user friendly and intuitive interface
- Gain efficiency through seamless integration with ERP and payroll for time administration and project costing
- Access to industry best practice expertise
- Foster collaboration between department and project leaders
